

APPENDIX B - REGULATED AIR POLLUTANTS

This appendix is intended to serve as a reference to identify both locally and federally regulated air pollutants that must be addressed in permit applications. Federally regulated air pollutants are defined in 40 CFR 70.2. Locally regulated air pollutants are listed in MCAPCO Regulation 1.5211 – “Applicability” and include those pollutants subject to regulation under MCAPCO 2.1104 – “Toxic Air Pollutant Guidelines”. There is substantial overlap between federally regulated and locally regulated air pollutants.

As defined in 40 CFR 70.2, regulated air pollutants include those pollutants that are regulated by the Clean Air Act or by regulations that EPA has promulgated to implement the Clean Air Act. These include the 187 hazardous air pollutants (“HAPs”) listed in 112(b) of the Clean Air Act and those pollutants listed as 112(r) pollutants. It should be noted that when a pollutant is regulated for one source category by a standard or other requirement (e.g. NSPS, MACT), it is considered regulated for all source categories.

The list also includes the toxic air pollutants (“TAPs”) listed in MCAPCO 2.1104. These pollutants are not “regulated air pollutants” under the definition in 40 CFR 70.2 unless they are also listed as 112(b), 112(r), or Title IV pollutants. TAPs are regulated at the Local level. They are to be addressed in permit applications at the time and manner specified by the North Carolina Division of Air Quality.
